

# ➤ Masinuta de Curse Electrica

X44 • O masinuta de curse electrica super rapida – asambleaz-o si las-o sa zboare!

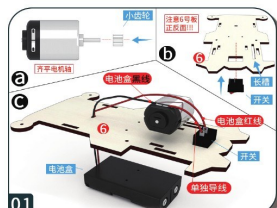

## De ce ai nevoie?

- |                              |                           |                          |
|------------------------------|---------------------------|--------------------------|
| • Placi lemn sasiu/caroserie | • Motor electric puternic | • Cutie baterii 2xAA     |
| • 4 roti mari curse          | • Axe rotative            | • Fire rosu/negru        |
| • Suruburi/stifturi          | • Surubelnita             | • Comutator pornit/oprit |

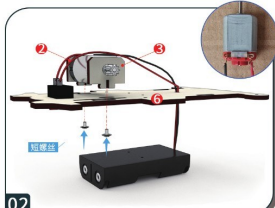

## Pasii de asamblare

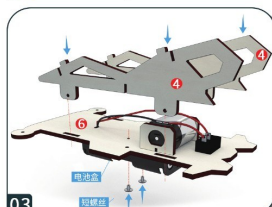

⚠ 木板切割 安装要小心  
如有松动 用胶水固定

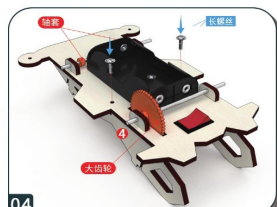

▶ 01 小齿轮安装到电机轴上【**对齐电机轴**】。b 开关按压到6号板底部【**注意6号板孔位方向**】。c 电池盒导线穿过6号板孔。● 电池盒黑线接电机左边，电池盒红线接开关触点。● 单独导线一头接电机右边，一头接开关触点。

▶ 02 2号板和3号板放在电机两头。● 安装到6号底板上，底下用短螺丝固定。

▶ 03 用短螺丝固定电池盒。● 4号板安装到6号底板上。

▶ 04 长螺丝固定4号板。● 穿长车轴，带上大齿轮和轴承。【注意大小齿轮相互啮合】

▶ 05 橡皮筋挂在车轴上。● 安装上车轮。● 1号板5号板用长螺丝固定，即可完成安装。【重点：车轮、轴承和木板留有活动间隙，避免卡死。】 有故障现象请查看正面故障排查部分。

### 1 Sasiul (baza)

Fixeaza placa de baza cu suporturile pentru motor folosind stifturi.

### 2 Motorul electric

Fixeaza motorul pe sasiu. Trebuie sa stea ferm si sa nu se miste.

### 3 Bateria si comutatorul

Fixeaza cutia de baterii. ROSU cu ROSU, NEGRU cu NEGRU. Monteaza comutatorul.

### 4 Caroseria de curse

Prinde piesele formand forma unui bolid. Fixeaza aripile frontale si posterioare.

### 5 Cele 4 roti mari

Pune rotile pe axe apasand ferm pana fac 'click'. Rotesc liber!

### 6 Pune bateriile si da-i DRUMUL!

Pune 2 baterii AA proaspete. Apasa comutatorul – ZBUUUUM!

## ATENTIE!

- Nu lasa masinuta sa cada de pe masa – lemnul e fragil!
- Nu bloca rotile cand motorul functioneaza – se supraincalzeste!

## Stiai ca...?

- Daca merge inapoi, inverseaza firele motorului!
- Masinute Formula 1 reale au 1000 CP si merg 300 km/h!
